

SILOPTOP® RO3 SILO VENTING

This is a superior solution for bin or silo venting that incorporates stainless steel seal plates.

SILOTOP® is a cylindrically shaped dust collector for venting of pneumatically filled silos. The stainless steel body contains vertically mounted, POLYPLEAT® filter elements. The air jet cleaning system is integrated in the hinged weather protection cover.

Dust separated from the air flow by special POLYPLEAT® filter elements drops back into the silo after an integrated automatic reverse air jet cleaning system inside the weather protection cover has removed it from the filter elements.

FEATURES & BENEFITS

- Compact 800mm (30 in) diameter 304 stainless steel body with bottom flange & 24.5m² (264 sq ft) filter surface
- Maintenance height = 1,100mm (3.6 ft)
- High filtration efficiency due to POLYPLEAT® filtering elements
- Low dust emission level due to B.I.A.- certified filter media
- Maintenance - free air jet cleaning unit integrated inside weather protection cover
- Safe weather protection cover with lockable snap hook
- Robust design
- No tools required for filtering element removal
- Perfectly accessible due to compact design
- Complete replacement of filter media by only one person within a few minutes

SPECIFICATIONS

Body: Ø800mm
 Filter Surface: 24.5m²
 Maximum Height When Closed: 1100mm
 Max Height When Opened: 1850mm
 Weight: 79Kg
